Portfolio Health Score

A high-growth, high-risk portfolio with good category diversification but significant AMC concentration and critical nominee registration gaps in demat accounts.

Key Observations

5 insights about your portfolio

- 1 The portfolio has demonstrated a strong YTD growth of 16.82% from December 2024 to December 2025.
- 2 There is a very high equity exposure of approximately 99.83% across direct equities and various equity-oriented mutual funds.
- 3 A significant portion of the portfolio, 53.71%, is concentrated in Edelweiss Mutual Fund, indicating a high fund house specific risk.
- 4 Three out of five demat accounts (ICICI Bank, Upstox, Indstocks) do not have a nominee registered, which could complicate asset transmission.

- 5 The portfolio experienced a substantial monthly decline of -24.48% in September 2025, highlighting its high volatility and risk profile.

Strengths

3 positive aspects

- ✓ The portfolio shows strong overall performance with a 16.82% YTD growth, indicating successful investment choices.
- ✓ Good diversification across various equity-oriented mutual fund categories, including small cap, mid cap, and international funds.
- ✓ All mutual fund folios have nominee registered, ensuring a smoother process for the majority of the portfolio's value.

Areas of Improvement

3 areas to address

- ✗ A critical area for improvement is the lack of nominee registration in 60% of the demat accounts, which could lead to legal complications.
- ✗ The portfolio exhibits high concentration risk with over 53% of the value invested in a single AMC (Edelweiss Mutual Fund).
- ✗ The absence of significant debt allocation (only minimal liquid/overnight funds) makes the portfolio highly susceptible to market downturns.

Recommendations

3 action items for you

1

Immediately register nominees for the ICICI Bank, Upstox, and Indstocks demat accounts to secure asset transmission.

[Take Action →](#)

2

Diversify investments away from Edelweiss Mutual Fund to reduce concentration risk and spread exposure across more fund houses.

[Take Action →](#)

3

Introduce a strategic allocation to debt funds (e.g., short-duration or corporate bond funds) to balance the high equity exposure and provide portfolio stability.

[Take Action →](#)
